The U.S. Department of Agriculture (USDA) and Scott SWCD prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410 or call

FREQUENTLY ASKED QUESTIONS

What is Plantskydd?

- Plantskydd is an animal repellent developed in Sweden – now made in USA from 100% natural ingredients. The “active” ingredient is dried blood (porcine and/or bovine) recognized by the EPA as an environmentally safe ingredient and is exempt from EPA federal pesticide registration.

Is Plantskydd safe to use?

- Plantskydd contains no synthetic additives, is non-toxic and is not harmful to animals or the environment when used as directed. *Caution: wash hands after use; wash fruit and veggies before eating; do not ingest powder or liquid solution. Keep out of reach of children and pets.*

How does it work?

- Animals avoid plants before they bite – not after. Plantskydd repels by emitting an odor that browsing animals associate with predator activity. The odor is not unpleasant to applicators or planters. *Proven effective in extensive field trials against deer, elk, moose, rabbits, and opossum.*

How often do I need to treat my plants and trees?

- Treat plants before browse begins, in spring and fall. Frequency of application is dependent upon the growth rate of the plant. Always treat new growth until the plant has reached full size or leaf-out.
- Plantskydd lasts up to 6 months over-winter on dormant plants and up to 4 months during active growing season.
- Ideally Plantskydd is applied in the morning or late afternoon when the sun is not as strong. Important: apply solution on dry plants and allow to dry thoroughly for at least 24 hours before watering or rain.

What formulation of Plantskydd is best for me?

- 1 quart “Ready-to Use” sprayer will treat approximately 100 plants 1 ft high. *Ideal for small gardens – or as a sample to prove to yourself that “Plantskydd really works!”*
- 1.3 gallon “Ready-to-Use” jug will treat approximately 400-600 plants 1 ft high. *Ideal for large properties. Favored by golf course and municipal landscape personnel – where multiple spot applications are required.*
- 2.2 lb soluble powder concentrate will treat approximately 400-600 plants 1 ft high. *Ideal for those requiring flexibility to mix just the right amount of Plantskydd at varying dilution rates e.g. nursery, forestry applications.*

How long can I keep Plantskydd in storage, before use?

- Soluble powder concentrate Plantskydd in its original packaging lasts 2 years when kept in a dry, dark, cool (not freezing) place. Plantskydd is a 100% natural product and will start to “go off” in warm weather. Once mixed into solution, use within a few days. Tightly re-seal unused powder and store as above.
- Ready-to-Use Liquid Plantskydd should be used within 3 months of opening the sealed container.

Will Plantskydd hurt my dog?

- Some users have reported that the family dog is quite enamored with Plantskydd when it is still wet on the plants. It will not harm animals but it’s best to leave Fido inside until the treated plants are dry.
